Profile

Frontend engineer proficient in writing clean and reusable code. To maintain and improve the usability of online applications, I keep up with the most recent tools. My professional objective is to create methods and software tools that enhance the delivery of services and result in great projects.

Employment

Frontend Engineer Mar 2022 - Jul 2022

Charles Technology, Ghana

- I am responsible for developing a fullstack web application by integrating REST API and working closely with back-end developers.
- I design the website's user interface based on Figma design and ensure it is user-friendly
- To keep up with the latest trends, I research and incorporate the newest software and tools into the web application.

Frontend Engineer Jun 2022 - Nov 2022

AZA, Lagos

- I am responsible for developing a fullstack web application by integrating REST API and working closely with back-end developers.
- I design the website's user interface based on Figma design and ensure it is user-friendly
- To keep up with the latest trends, I research and incorporate the newest software and tools into the web application.

Certificates

Kwara hackathon Jan 2023

I participated in a hackathon competition to solve government problems. My team and I worked on, and are still working on, tracking correspondence software for school records.
